"Helping people save and make money."

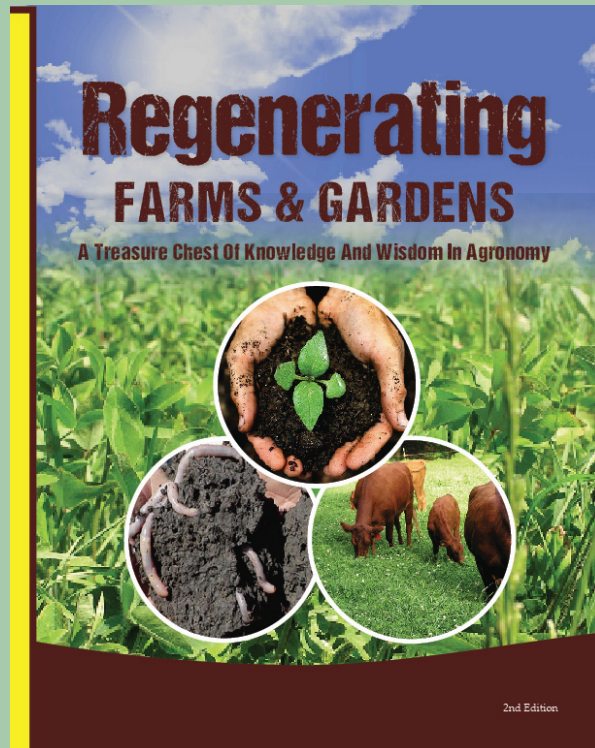

Presenting a new book on an old subject from a fresh perspective for farmers and gardeners.

Conventional agriculture has taken a once fertile soil to a soil almost devoid of any topsoil or fertility. Rains erode it away to the oceans at an alarming rate. Why are floods a commonplace occurrence today? The once fertile prairies were covered with 6' of topsoil. How was this formed and how long did it take? Where has all the fertility gone? How do we regenerate the soil back to its former state? The secret is how the plants and animals above the soil relate to the life in the soil. Learn the lesson of the buffalo. Use what they taught us on your farm or in your garden to regenerate your soil.

Trees are the forgotten commodity of both farmers and homeowners. Discover how one man paid for his farm several times over by managing his small woodlot well.

This book is a treasure chest of knowledge and wisdom in agronomy whether you grow a few flowers in a planter box or farm a thousand acres. Secrets of

down to earth, natural, and sustainable practices will help you be a success with our most valuable resource-- the soil. Packed with hands-on activities for the young at heart and written in easy to follow language, the text will clarify previous hard to understand concepts and will help you become a better caretaker

of the soil whether you are just beginning or are an old hand at it. This guide will be an essential and valuable reference for you in years to come.

"We have really enjoyed [this book]. There is a lot of excellent information in it. We are buying one for our school library and one for a neighbor who is grazing some of our cattle for the grassfed market. Thanks for your wonderful book." Wayne Jantzi VA

"Every Amish family should have this book." -David T. Dundee, OH

"It is so important that our sons and daughters learn these things. This stuff is so important to know whether they end up farming or living on a small lot with a garden. This book should be used in our schools." -Abe S. Punxatawney, PA

"This book is a very, very valuable book. I did not have much knowledge in working with soil. Just reading and getting to know the process of how things work in nature has been invaluable in how to prepare the ground so nature can do its work the way it was designed. Thanks for the unmentionable amount of effort and time you have contributed to this end of things. Sharing your information is the reason we as a community are as successful as we are." -Joseph J Schlabach, MI

"We have really enjoyed [this book]. There is a lot of excellent information in it. We are buying one for our school library and one for our neighbor who is grazing some of our cattle for the grassfed market. Thanks for the wonderful book."

2nd Edition!

... is revised and expanded. New subjects added.

Now classroom friendly with many simple, hands-on activities.

Good for study by individuals too.

"It is written in a very easy to understand format. I have recommended it to many friends." -T C S, Manchester MI

Give a gift that lasts all year!

Keep it handy on your shelf for easy reference.

Use it in a classroom and watch 'em get excited.

Who Is It For?

Great care was taken to make this text readable for the young and old, the educated and those still getting theirs, and for everyone in-between.

If you are an individual intending to study these contents on your own, then congratulations! We hope you have a great time while you learn some things from the comforts of your stuffed arm chair that you will actually use in practical everyday life.

The progression of circles up or down show various fertility stages of soil. At what stage is your soil? Which direction is it headed?

Keep it on your shelf and use it often as a reference. Many others are. In the sequence of circles above, which direction is your soil going, up or down?

If you are an educator of those who are in formal school, then we took great care to try to make it easy and interesting for you to teach it as a "Soils" subject [or whatever else you wish to call it]. Learning is like a string. It's hard to push it. If someone wants to learn, half the battle is won before you start. We hope

those whom you are responsible for will want to absorb it into their "noodle." You can help by making the subject interesting, especially when you involve them in the activities listed throughout the book. We know, it will be so much easier to skip them but consider this mantra to educators: "Tell me, I forget; show me, I remember; involve me, I learn."

Forward

The family farm provides an ideal setting to teach children scriptural stewardship in God's earth. Why then have family farms become fewer in number? Someone will answer, "There's no profit in farming: we can't pay the bills." It is true that world economics have changed drastically. But a bigger problem may be that we are not well educated on soil stewardship. This book is a breath of fresh air on this neglected subject. You will find hands-on teaching which includes pictures, illustrations, experiments, and a sprinkling of humor scattered through. Even young children will enjoy looking at the pictures.

So as teacher of our school's soils class, I took most of the lessons

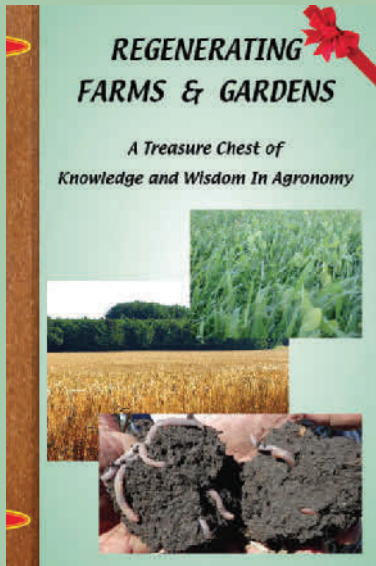

from R FAG's text (1st edition) and correlated each lesson to the growing process. We tested soil. We looked at biology under the microscope. We built a small greenhouse and an outside hotbed for lettuce. We planted tomato and cucumber seeds for the greenhouse. The boys built a compost pile which they turned every week in class. The girls transplanted, suckered tomatoes, and tied up cucumber vines. Each student was rewarded with a flat of vegetable and flower plants and a bucket of compost to take home for a personal garden. They also received a personal copy of "Regenerating Farms and Gardens." Their last class assignment was a composition, "How I Would Improve My Acre of Neglected Land on a Shoe-string Budget." Is this not real life—improving land with little cash? The last class event was a locally grown meal of potato-bar, dewberry cobbler, and hand cranked ice-cream made with food from our greenhouse and ingredients contributed by our soils committee. Who says you can't raise your own local food? Did the students learn anything? One mother said, "What are you teaching in that class? My son is requiring me to stop for road kill to retrieve it for his compost pile." Another son has assumed the management of his family's garden, including a compost heap to improve the soil. A com-

mittee member bought a no-till pasture seed drill and started a custom business drilling cover crops. He did hundreds of acres last year (2019). He found the seed company in the back of Regenerating Farms and Gardens.

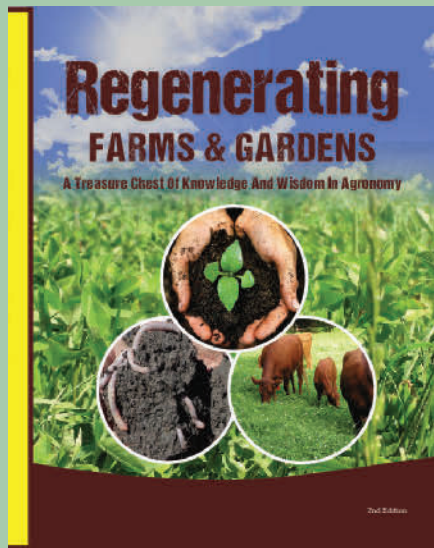

I asked my students one day during soil class, "Where did the seeds come from for this year's garden?" The reply was, "We buy ours from a seed catalog." "Really, where did the seed company get the seeds?" The student did not know. Do you?

The correct answer is "from last year's crop." When is the last time you thought about that? How many other life functions have we become disconnected from? This book seeks to instruct on basic life cycles and functions that undergird an agrarian lifestyle. The book is arranged in logical sequence with exercises interspersed making it ideal for use in a classroom setting. But you will also want a personal copy to carry to the field for reference. Here is a wealth of practical knowledge covering many aspects of soil and animal stewardship. This book will change your perspective. Implementing these truths should profit your bottom line, and may be a key factor in keeping the family farm or at least the family garden alive and well.

- Ernest E Eshbach Kemp, Texas

1st Edition

2nd Edition

Regenerating Farms & Gardens

Learn about . . .

- Soil & Plant Biology
- Manure, Compost & Humus
- Soil & Plant Nutrients
- Building Soil Fertility
- Soil Prep & Planting
- Weed & Insect Control
- Grains, Grasses, Legumes

- Garden Produce
- Grazing, Cover Crops
- Beef, Dairy & Sheep
- Pork, Poultry & Fish
- Minerals & Animal Health
- Stray Voltage, Toxic Forages
- Aquaculture, Aquaponics
- . . . all explained in simple terms.
 - Illustrated w/260+ color pics
 - 6" X 9", 352 Pages
 - Hard Cover

Regenerating Farms & Gardens

Learn about . . .

- Everything in the 1st edition (on the left) **PLUS**
- Climate
 - Gardening Methods
 - Growing Produce
 - Managing Trees (*invaluable*)
 - Several 1st edition sections expanded.
- Topics are streamlined and now classroom friendly. Simple short lessons combined with lots of hands-on activities will make this a favorite subject. (See the next page.) The soil is regenerated when plants and animals are used correctly. Learn the lesson of the buffalo and it becomes easy to build fertile topsoil.
- Illustrated w/330+ color pics
 - 8 1/2" X 11", 308 Pages
 - Laminated Cover

R FAG 2nd Edition Layout is conducive to easy learning, free of frustrations.

Reading comprehension level of the text is about the same as a common newspaper for appeal to the most common readability audience.

Important words in bold. Definitions are located in the same sentence or defined in the same proximity, eliminating the need for a dictionary or glossary.

Chapter title and brief introduction.

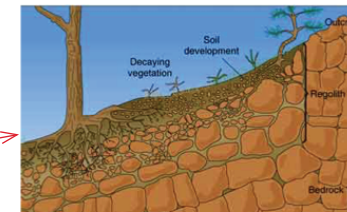

Chapter 3 Soil Fertility

The second major factor necessary for agronomy to be a success is to have good soil **fertility**. This is the quality of the soil which makes it capable of producing abundant vegetation or crops. Air and water have an influence on climate. They also play a major role in fertility. Nutrient stress is the most common crop stress affecting yield. Man can influence **fertility** but only certain parts of it. Even then it is not an easy endeavor. We will study three aspects of soil: texture, nutrients and biology.

"Civilization itself rests upon the soil." -Thomas Jefferson

3.1 Soil Texture: Minerals & Metals

Soil is one of man's most valuable resources. It is a life giving treasure. Without it, nothing would be able to live. The soil texture is the physical features of the soil such as the size of the soil particles [soil structure is how the

particles relate to each other]. They consist of none other than tiny bits of rock that have broken apart. Rocks are made of special substances called minerals. Metals such as gold, silver, copper, iron, aluminum and others are

mixed into rocks. New soil is formed in a process called **weathering** [being worn down by the environment]. Weathering is a long process which takes many years to accomplish. There are two kinds of weathering.

Chemical weathering is when the makeup of rock is changed by acid. Lemon is an acid that you have at home. Rain water mixes with gases in the air such as oxygen and carbon dioxide to produce an acid which slowly weathers rock. Plants such as lichens and moss produce acids that weather rock. The acid in **glucose** [GLU kose - plant sugars] will weather rock material deep in the soil. When worms ingest soil particles, their digestive juices will weather soil particles.

Physical weathering is when rock is broken down by physical force. Areas where temperatures change from freezing to thawing repeatedly have the most rapid break down of rock into smaller particles. The high heat during the day and the freezing cold of night, especially in desert areas, cause rocks to break apart. Sounds like gunshots are often heard because of the stress of rapid cooling. Freezing water will also cause rocks to break apart. When water freezes, it expands in the cracks of the rocks, busting them apart. Even a plant's roots can split rocks apart. Water running over rocks will wear them down. Sometimes the wind will pick up sand and drive it against rocks and wear them down.

3.1 Section Review

1. Define fertility, weathering, chemical weathering, glucose, physical weathering.

31

Phonetic pronunciations are included for the difficult words.

Numbered sections show number of chapter and section.

Sentences stating important principles are in *italicized bold* type.

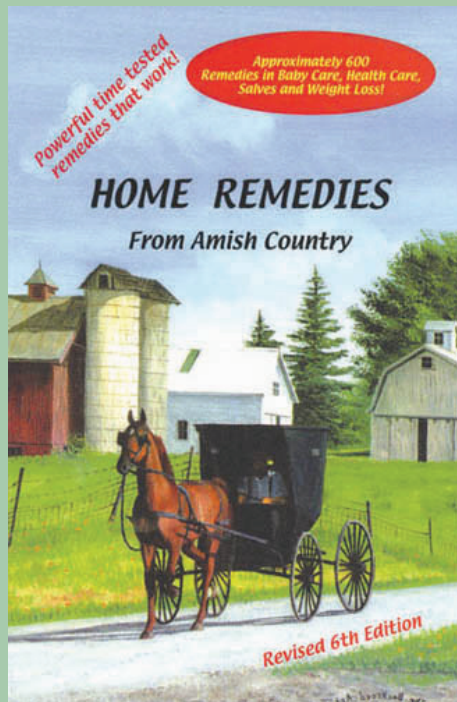

Many full color pictures are used to illustrate the text.

Simple hands-on activities for the young at heart will keep the involvement and enthusiasm high.

Interesting tidbits spice up the learning experience.

Chapter summaries bring the most important information together.

Each section has a short review to help emphasize the important points.

HOME REMEDIES I

FROM AMISH COUNTRY

Over 500 Remedies In Baby Care, Health Care, Salves, & Weight Loss. Choose from a weight loss smorgasbord of all natural, safe methods for losing pounds and keeping them off, simple and easy. Take a few minutes twice a year to complete the most powerful thing you can do for your overall health improvement. Do you have a colic baby? Try this little known remedy with a near 100% success rate. Does cancer concern you? No need for that! See page 22. Do one simple thing that takes only seconds and minimize the number of colds you have. Good farmers use this

element to grow healthy crops and animals. Use this same element to maintain your own good health. Save thousands! The remedies in this book use everyday items that are easily attainable from the cupboard, the garden and the local general store.

• Full Color Cover • Perfect Bound • 5 1/2" X 8 1/2"

"This is very handy to have around. I have used a lot of these remedies. Of all the similar Amish remedies books, this is by far the best I've seen." - Meg

"We use this book so much, we keep it on our kitchen table. Please send 5 more books for gifts to our children." - Columbus, OH

"If I would have had your book a few years ago and practiced just one home remedy with ingredients costing about \$2.75, I could have saved \$30,000 in hospital bills and much pain caused by kidney stones." - Augusta, OH

"This book has some really great natural remedies. I tried ___ on my daughter's acne and the pimples dried up in literally a matter of hours. Amazing! She is one happy camper these days." - Deb A.

"My mother which lives in another state, raved to us about your book. The store close to her was sold out of them again. She gave us your address and we drove over 20 miles so we could have our own copy." - Wooster, OH

"I enjoyed this book. Was amazed to see some of the home remedies my mother used [I'm 81 years old] so guess it was good stuff." - Aunts34

HOME REMEDIES II

Farm, Garden, Lawn & House

These natural home remedies will save you thousands! Increase the productivity of your cows, chickens, beef cattle, sheep, horses and other animals with these simple and economical methods. Keep them in excellent health to cut down on professional health care. Make your own homemade cleaners and use them for cleaning everything from your hair to bulk tanks. Easy on the environment and your hands. Use these remedies to increase productivity of your field crops, orchards and garden produce. They are often the same ones which will also keep them insect free! Have problems with animal or insect pests and don't know what to do about them? Learn how to control bats, birds, chipmunks, squirrels, deer, gophers, groundhogs, mice, moles, rabbits, raccoons, rats, snakes, ants, bees, hornets, yellow jackets, wasps, beetles, cockroaches, corn borer, fleas, gnats, aphids, grasshoppers, grubs, Japanese beetles, mites, mosquitoes, snails, slugs and many others. They are all simple and easy. Best of all, they actually work!

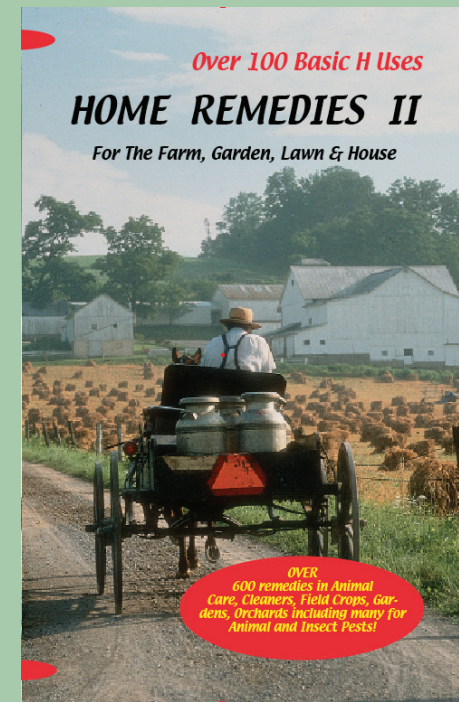

• Full Color Cover • Perfect Bound • 5 1/2" X 8 1/2"

"Awesome. Lent it out and now it's gone." - Susan P

"I love the information in this book. I refer to it often." - Gail C.

"Very pleased." - Customer

"Interesting book of remedies from safe and simple products, especially Shaklee that is included. Very helpful for both outdoors and indoors uses." - Jane S.

Purchasing this Bible will help send a Bible to people in foreign lands who have none. Give a gift of eternal value! Send it across the generations!

A Bible Using Quality Materials Is A Great Value

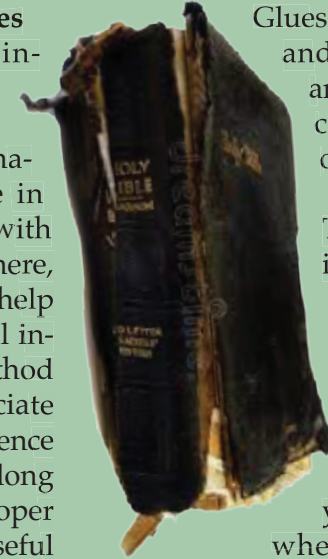

A Word About Study Features

The only safe method of interpreting the meaning of the Scriptures is to compare Scripture with Scripture. Analyzing a scriptural passage in its historical context along with answering the who, what, where, and when questions will also help in understanding the original intent. Those who use this method of interpretation will appreciate the comprehensive cross reference system of the red letter GEB along with the concordance, the proper names dictionary, and other useful study features.

Production Materials

We use only the highest quality materials to produce a Bible that will endure vigorous use for many years without it falling apart. The red letter GEB will outlast a cheaply made Bible several times.

Bibles made from cheap materials will fall apart after several years. We know because we've been asked to "fix" them. Cheap plastic (vinyl) or imitation leather covers will lose their lustre, become brittle, and crack over time. Bonded leather is made from ground up scraps of leather and glued together much like OSB lumber.

Glues tend to harden and break. Chips and pieces of the cover will wear off and separate.

The unique binding materials and processes that are used to produce the red letter GEB result in a strong firm binding yet still lays flat when open. Using

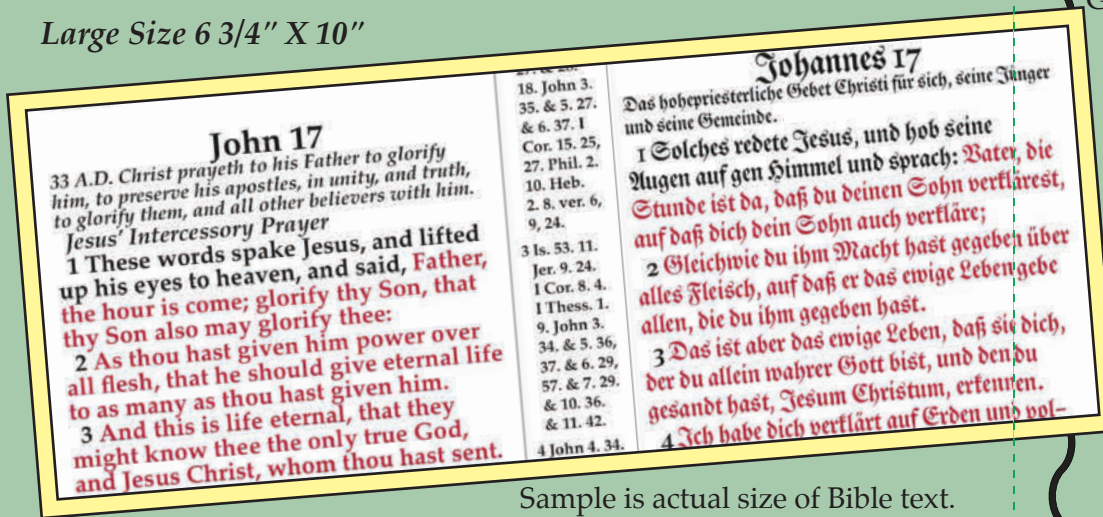

quality cover materials and a firm binding process using strong materials results in a durable cover that will keep its contents protected for the long haul.

Only high grade cloth material known for its strength and endurance are used for hard covers on the red letter GEB.

Genuine leather is exactly that: genuine. Genuine leather for the red letter GEB covers is one whole piece of leather fashioned into a cover. These are soft and smooth, durable, flex covers that have a pleasing texture.

Red Letter Edition

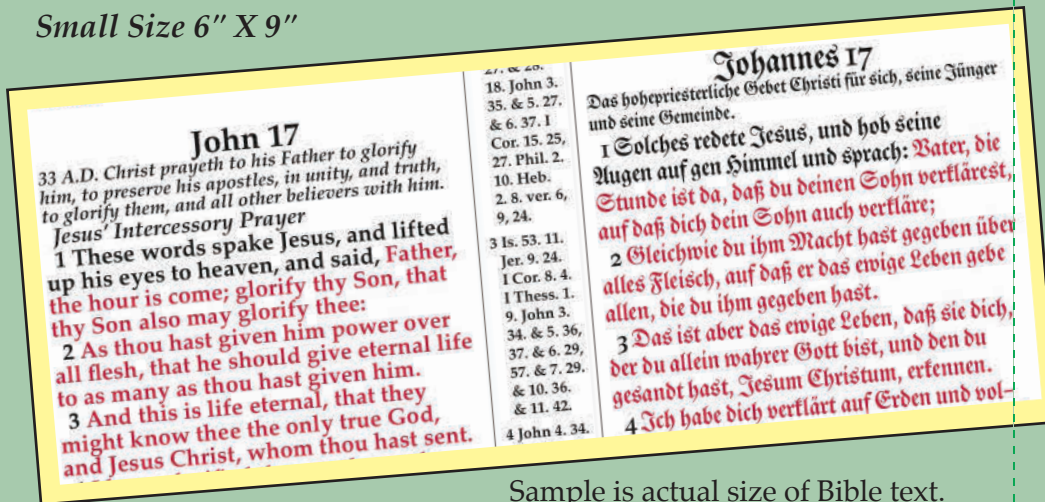

Large Size 6 3/4" X 10"

Sample is actual size of Bible text.

The text readability and resolution is crisp and clear; the letters, words, and lines have easy-to-read spacing; and the verses are all indented.

Small Size 6" X 9"

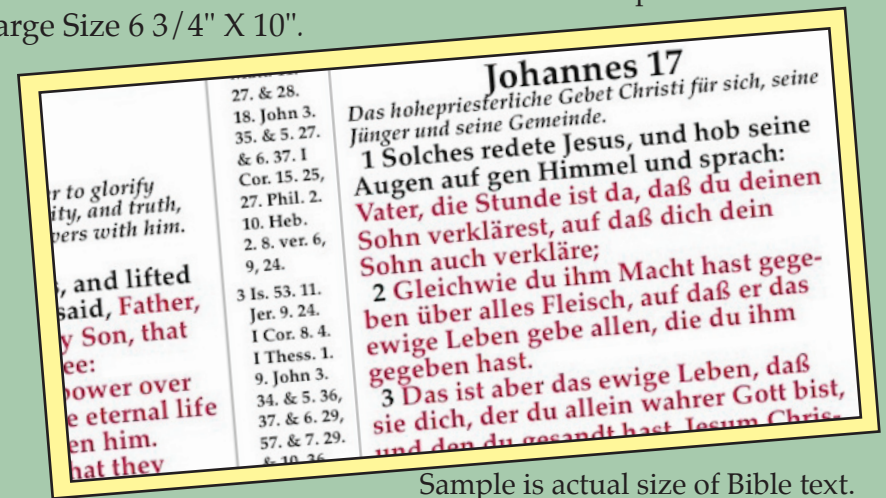

Sample is actual size of Bible text.

Standard Letter Edition

This edition is exactly the same as the Red Letter Edition except the German uses a standard Latin letter font. See the sample below.

Large Size 6 3/4" X 10"

Sample is actual size of Bible text.

PA Deitsch / Deutsch Bibel

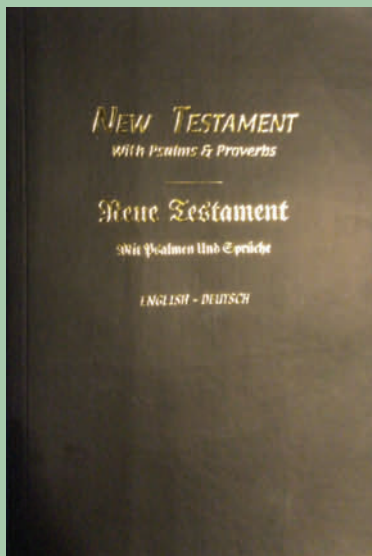

Sample is actual size of Bible text.

This Bible has the same study features as the Red Letter Edition plus:

- Cross references are throughout the German text instead of in a center column.
- Apochrypha in German and English side by side.

Purchasing these Bibles will help send some to those who cannot afford one.

I go _____ a place for you. John 14:2

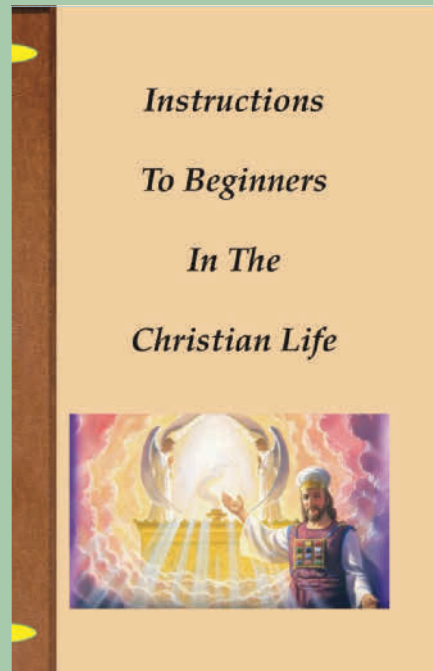

Ich _____ hin, euch die Stätte zu bereiten. Johannes 14:2

Dortrecht Confession of Faith Study Guide

This very practical study guide takes those in instruction class through the 18 articles of faith (1632), filling out questions about each. The scripture references used are printed in full throughout the text so you can spend your time studying instead of searching.

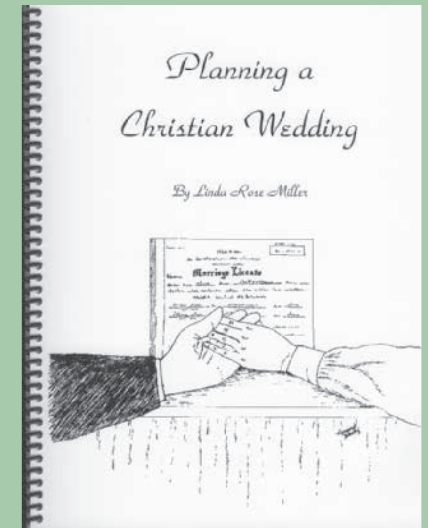

Instructions to Beginners in the Christian Life

This book was first published in 1934 and is an in-depth discipling guide used by churches especially for instructing those who have just begun the Christian life. It covers all of the Dortrecht Confession of Faith articles plus much more. The scripture references used are printed in full throughout the text so you can spend your time studying instead of searching. 96pp

Planning a Christian Wedding

Written from a Christian perspective especially for conservative Mennonites to promote peace of mind for the bride and groom on their wedding day. Includes checklists, helps for compiling the guest list, charts for helpers & invitations, instructions for helpers, tips for smooth serving at the reception, numerous other helps, aids to avoid the last-minute rush and room to add your own notes. Features a pocket folder in the back to hold your own notes and lists. -by Linda Rose Miller

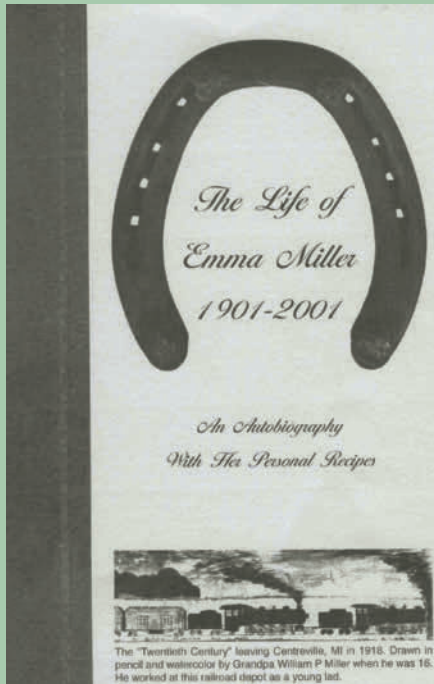

"The author of this book rightfully makes the point: 'As a Christian, you will want your wedding to be Christ-centered.' I affirm that, and encourage couples planning a wedding to make that a goal of priority. Since Christ has purchased us with His blood, and made us new in Him, it is now possible for two believers to be united in a Christian marriage to establish a godly home. For this reason the wedding should be Christ-centered. Each couple has only one opportunity for their wedding day. The seriousness of the matter, the planning, and the many fine details often bring on nervousness and tension and couples ask themselves, 'Will we do this right? What important point will we miss? Will it be Christ-centered?' This book is a helpful guide to couples and ministers in planning wedding details with confidence, giving the couple the assurance of a well planned day. They can be free and at ease to let

their minds be on the goodness of Christ, and to worship Him who made Christian marriage possible." -Simon Schrock

"This book is a must for the couple who desires to be organized. While it offers a variety of methods, it can easily be adapted to your individual tastes. I find it reassuring to check my lists frequently to make sure everything is being done on time. The author outlines every aspect of the wedding in an uncomplicated yet thorough manner, making it easy to plan for that special day. My mother is also grateful for this book. She says it puts her mind at ease." -Melanie Amstutz

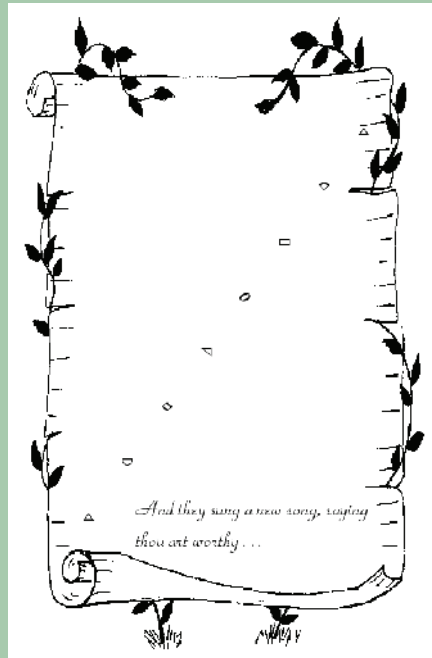

"As we began planning our wedding, I assumed my two older sisters would tell me all I needed to know. Then I decided to try Linda Rose's book anyhow and was thrilled with the pointers it gave. It is detailed and had more to say than either of my sisters." -Mrs. Susan Raber

Life Of Emma Miller

An Autobiography With Personal Recipes

Take a trip down memory lane with our grandma, Emma Miller, born in 1901, as she recounts how her Amish life was like growing up in Colorado, Indiana, and Michigan in the days of cowboys, log cabins, the Great Depression, WW II, and when eggs were 12¢ a dozen. From near scrapes with death to the humorous, make sure you have plenty of time when you begin reading. Emma's life was one of making do with what she had or doing without. 64pp

Basic Rudiments of Music

A brief yet comprehensive study of the basic rudiments of music. This book includes a short history of music, shaped notes, the scale, notes and rests, the grand staff, harmony, voice auditioning, timing, rhythm patterns, relative and absolute pitch, dynamics, reading music, posture, breathing and voice. Singing and written exercises are included to make practical use of what is taught. This work text has been used in school classrooms and youth groups with excellent success.

Strands of Finest Gold Tracts

SOFG is operated as a Not-For-Profit endeavor with support from various individuals. SOFG publications are mostly transcribed sermons and are made available to interested parties at less than the print cost. Abana Books assists in distribution. Most publications are handy pocket sized 4" X 6" booklets unless otherwise noted.

Anger, The Destroyer - Much irreparable damage in relationships has been caused by this strong human emotion. An honest look at what the Scriptures say about this subject. 20 for \$10

Bathsheba - This is an honest appeal to women to dress modestly at all times. Gives specific reasons why and explores Biblical principles on the subject. Explains how even the strongest of men can have their heart snatched away in a moment. All godly men will emphatically agree. 20 for \$10

Come Back To The Old Ways - A call to the Amish and Mennonite people to return to the "old ways" of our spiritual forefathers. Summarizes seven strengths of the 1st century church and why it had such dynamic power. 20 for \$10

Love Not The World - This examines what the Scriptures say about what is worldly. How we define what is "of the world" will dictate how we live. It will determine if our voyage will be successful or end in disaster. 20 for \$10

Please Let Me Stay - Nine year old "W M" spent his early years surviving life without his parents in Chicago's south side. This true story (some details are changed) recounts his quest for a stable home environment and the journey he had in finding that among the plain people. 20 for \$10

Removing Hindrances To God's Blessings - When offences come, the offender and the victims "stuff" the wrong into a closet. These skeletons will sometimes hang hidden away from view for years. But with consequences. We can choose how we live, but cannot choose the consequences of those decisions. Learn how God dealt with individuals, families and nations who brought offences. 20 for \$10

The Mind Under The Blood The mind is like a room in a house where visitors are entertained. These visitors first enter into the mind and when allowed to stay or entertained, they drop into the soul and spirit of a person and ultimately possess the whole man. The blood is our only hope and safeguard. 2 3/4" X 5 1/2" - 3 panel fanfold. 60 for \$10

We do not accept credit cards. Please pay by check. Your order will not be processed without full payment. No exceptions. US funds only.

Prices are subject to change without notice in these unprecedented times of high shipping costs, inflation, and volatile costs of raw materials.

Do not use any previous order form. By using only the most recent one, you will ensure that your order will be processed in a timely manner. Your address must be correct and exact. Packages cannot be sent to just PO addresses. We may have no other way to contact you if your order is returned to us by the USPS.

When leaving a voice message, we will return your call but we cannot if you don't have voice mail or the information you leave is not understandable. Your phone number/name & address must be spoken slowly and clearly. If you leave a voice message, it helps us immensely if you say your name and phone number first rather than last, especially if your message is a lengthy one. We hope to hear from you soon.
